

Fostering a Modern, Intelligent Compliance & Ethics Department with Cutting-Edge Platform Solutions

A Single, Unified Reconfigurable Platform to Spawn Compliance & Ethics Driven Business Applications

319 InSight is the inventor and developer of Platform319 – a highly acclaimed cloud platform that provides valuable solutions for Compliance and Ethics teams to unique business challenges in a flexible, powerful, and secure manner.

Platform319 has been engineered from the ground-up to be a fully reconfigurable environment, providing significant advantages to any kind of organization. A reconfigurable platform allows for quick, easy, and continual modifications to its applications, users, portals, dashboards and reports as needs evolve, without interrupting business operations whatsoever.

Importantly, the reconfigurable platform automates and conforms to each organization's unique process and workflow, allowing its users to realize its benefits with little adoption time needed.

319 InSight's Platform319 serves as a holistic system to automate important compliance and ethics-driven functions within a single, integrated repository.

IT INCLUDES SOLUTION-BASED APPLICATIONS FOR:

- 3rd Party Due Diligence
- Employee Certification
- Gifts & Hospitality Compliance
- Customer / Vendor / Employee On-Boarding
- eLearning / Corporate Training
- Industry Regulations
- Internal Investigations
- Policy Management
- Custom Solutions
- And more...

Companies have the ability to start with one or two applications and expand into others over time. As applications are deployed, Platform319 provides for cross-functional reporting, revealing key business insights and helping leaders make better, more informed decisions.

A Low Cost of Ownership Enables a Lean, Nimble, and Productive Department

Compliance and Ethics teams are faced with an ever-growing set of responsibilities, yet lack the necessary budgets to keep pace. Team leaders are being forced to be creative in the discovery and implementation of innovative tools to help them run and manage a successful department.

Platform319 by 319 InSight has proven to be an industry leader in its low cost of ownership. Its reconfigurable architecture provides for configuration rather than development; significantly reducing the cycle time to deploy, update and enhance its functionality. This results in very low costs to its users.

Platform319's reconfigurable workflow engine is an extremely powerful technology that enables dynamic, event-based routing, permissions, notifications, scheduling, prioritizing, and tasking. This technology allows for processing to seamlessly match offline behavior, allowing work to be achieved faster, more efficiently, and at a much lower cost. Its proprietary, automated in-line decision processing tools also greatly reduce workload tasks, increase throughput and assure accuracy, resulting in fewer demands on administrative staff.

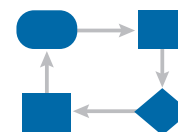

Reconfigurable Platforms achieve immediate and continual success for the enterprise like no others

A fully integrated multi-application platform is superior at automating the enterprise

Platform 319 continually achieves the greatest value for the Lowest Cost of Ownership

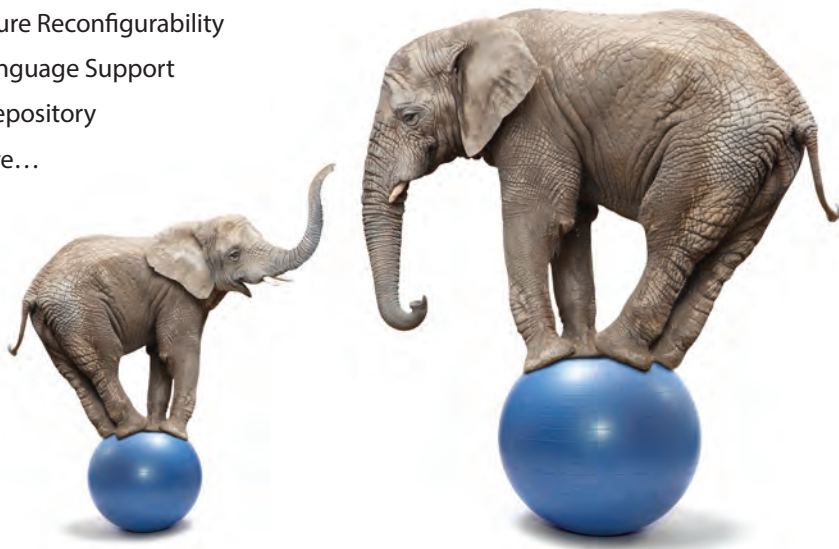

Best in class workflow engine automates the most complex workflow needs that others fall short on

Notably, Platform319 is a cloud-based platform which substantially reduces adoption costs within organizations. Another advantage of operating as a cloud platform is comprehensive management, maintenance, continual enhancements and upgrades of the system. All of 319 InSight's clients gain these benefits worldwide at a very low cost due to its configuration within the cloud.

Importantly, the platform allows for continual expansion into other applications, which enables Compliance and Ethics teams to maximize productivity, reduce acquisition costs and to employ one single point of responsibility for its business functions.

Powerful Platform Technology & Features

- ✓ One-to-Many Customized Portals
- ✓ One-to-Many Contributors
- ✓ One-to-Many Auditors
- ✓ Advanced Questionnaire Logic
- ✓ Integrated Video and eLearning
- ✓ Customizable Team Dashboards
- ✓ Custom Push-Button Reports
- ✓ Powerful, Custom Workflow Technology
- ✓ Fault-Tolerant Secure Cloud Network
- ✓ Corporate Single-Sign-On Integration
- ✓ Internal Secured Platform Integration
- ✓ Automated Data Refresh/Renew Processing
- ✓ Automated Project Start Administration
- ✓ In-line Contact Create Technology
- ✓ Automated File Watch Technology
- ✓ Innovative Notification Technology
- ✓ Full Feature Reconfigurability
- ✓ Multi-Language Support
- ✓ Single Repository
- ✓ And more...

Expert Guided Process Engineering to Automate Critical Compliance & Ethics Operations

319 InSight offers expert-guided process engineering services along with each installation, in order to optimize business processes and to assure a successful transition to Platform319. Each case is approached in a unique manner, so that organizations can make the most out of their past investments in technology and processes, while evolving into a modern, intelligent compliance department.

319 InSight's staff has experience working with Fortune 500 companies, government agencies, global organizations, private businesses, and mid-market firms of all types.

Our process includes deep-dive investigations, thorough evaluations of current assets and processes, best practice recommendations and guidance, procedural definition and systemization, comprehensive field testing and on-going modifications. These services support our mission of fostering a lean, nimble, and productive compliance infrastructure for our clients.

Modern Compliance and Ethics teams are rapidly moving toward Cloud based Platforms
